role
strategy lead

alma mater
harvard

previous work
ex-mckinsey

- critical thinking
- strategy
- vision
- navigation skills
- classical ballet

researching
transhumanism · nietzsche · urban agriculture

bryan cash

- computer scientist
- sports savant
- optimizer

role
technology lead

alma mater
syracuse

previous work
ex-washington post

- systems design
- enterprise apps
- big data
- bowling
- chess

researching
technofeudalism · neuroathletics · socratic methodology

bakari kitwana
ex-eic of the source magazine

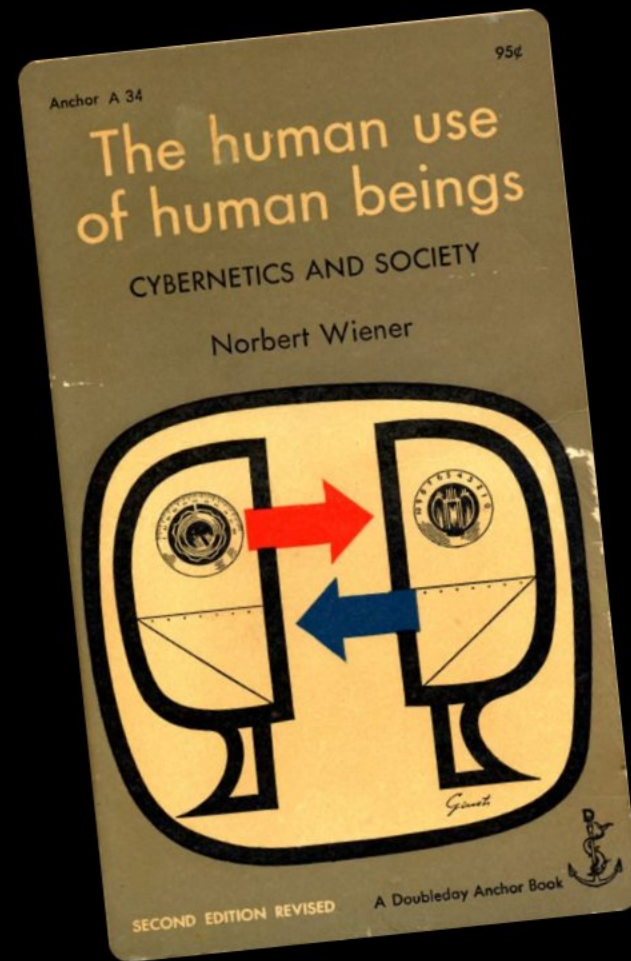

caitlin begg
ceo of authentic social and return to analog podcast

advisory board

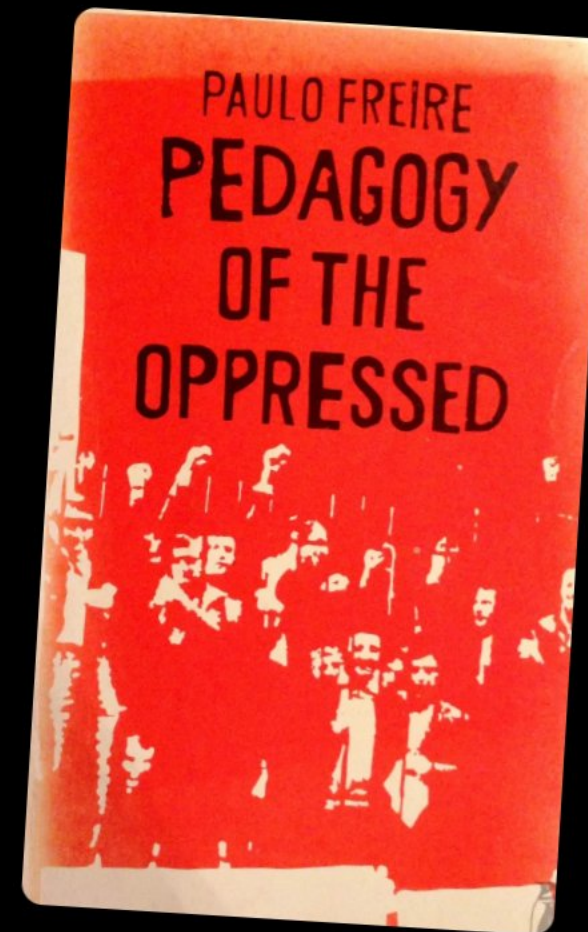

calvary rogers
ex-google, founder of seneca labs

we're in a crisis.

ai = cognitive resignation

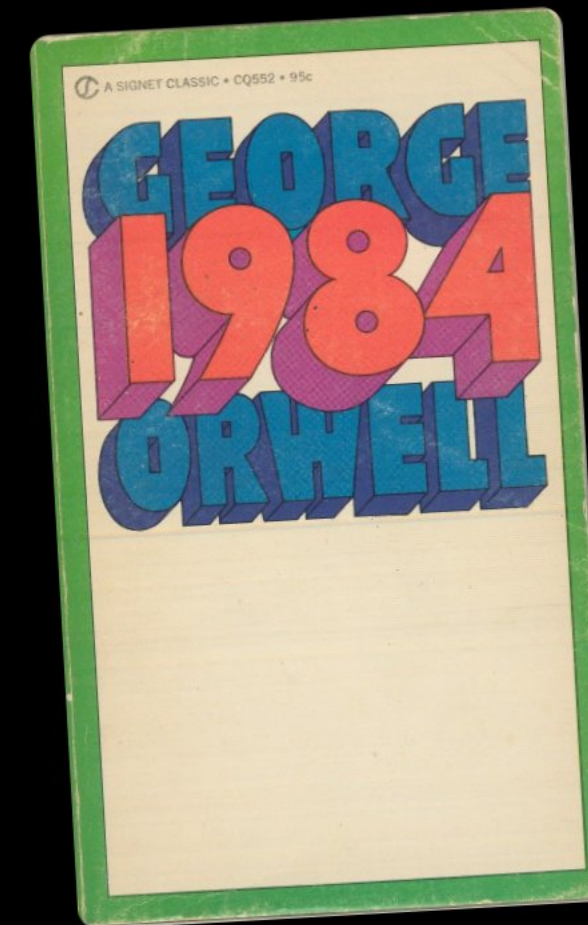

"your brain on chatgpt: accumulation of cognitive debt"

'veritas' is performative

"college professors say their academic freedom is in decline"

THE
CHRONICLE
OF HIGHER
EDUCATION

"safety" = mass surveillance

"homeland security subpoenas ice critics online"

[see our weekly pulse check here.](#)

but crisis always sparks counter culture.

the agora

athens, 500 bc

where free thought had a home before the academy existed.

the salon

paris, 1700s

where conversations that built the enlightenment happened in living rooms.

harlem renaissance

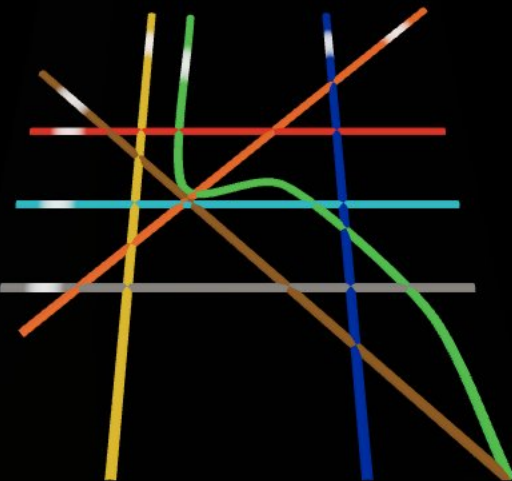

new york, 1920s

where Black intellectuals made space for possibility in the midst of danger.

what about now?

we're the new underground.

how it works

01
underground

where you become dangerous.

a living world of buried artifacts, suppressed ideas, and unexplored intellectual territory — that maps your thinking over time.

*swipe your cyphcard in our underground,
or irl from your apple wallet.*

explore underground ideas.

swipe in. pick a route. uncover rare, human-authored treasures your algorithm would've never surfaced. your journey becomes a personalized map of *how* you think.

all resources are **human-produced**. never ai slop.

demo available upon request.

how it works

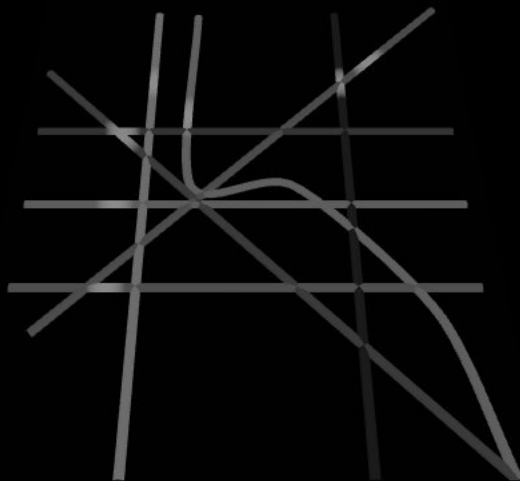

02

cyph

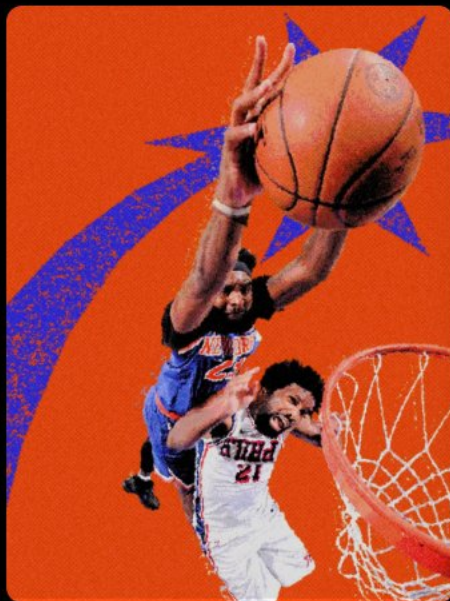

where ideas get tested in real time.

a live intellectual ‘cyph’ that resists the echo chamber and places you into productive tension with minds you'd never otherwise meet.

live

topics sourced from API's & real-time listening.

Knicks Championship

conceptual

ideas surfaced from pulses in deep research.

is the soul actually cartesian?

match with cyphers around the world.

open mic

say what you mean. raw, unfiltered, first-person.

office hours

1-on-1. you ask, they answer. no panel, no moderator.

supper club

small room. good food. hard questions.

debate

structured. timed. two sides. one question.

demo available upon request.

how it works

03

irl

touch grass.

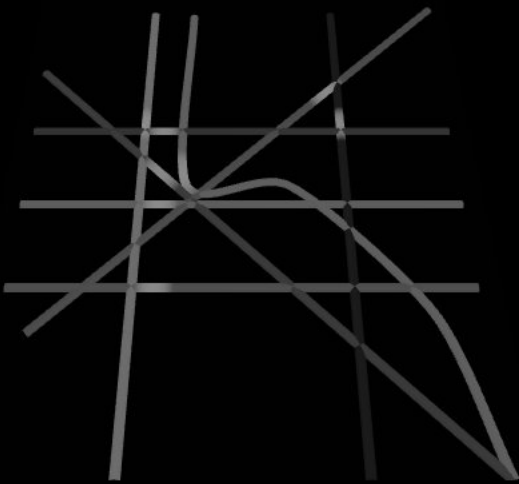

everything found underground and tested in the cyph finds its fullest expression here — the tangible world, the human face, the experience that changes you.

we drop IRL cyphs.

no more screen addiction. close the laptop and enter our world of IRL lectures, office hours, supper clubs, & debates.

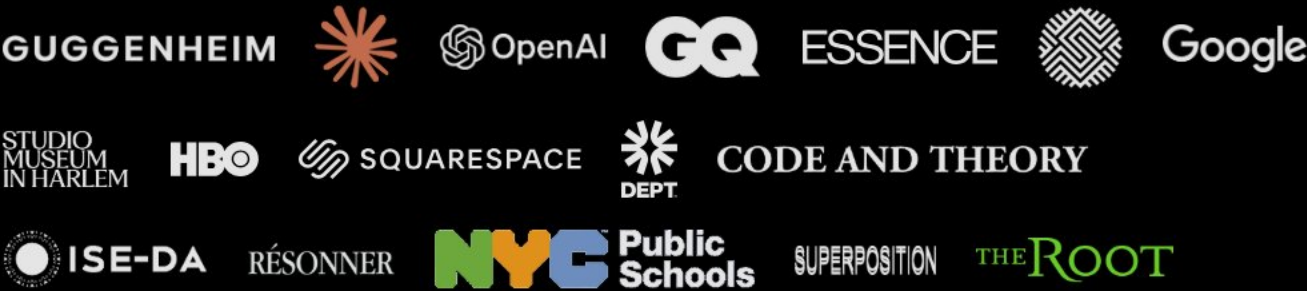

40+ residencies and venues.

our last cyph...

in the room

demo available upon request.

what real peeps have said.

"people are yearning to break the shackles and speak their truth."

"it encourages individuality...there's no need for an echo chamber."

"i like that it's centered around topics and things that matter rather than a sea of content."

"i love cyph because I can find actual scholars whom i would want to talk with."

"i've been craving a place to actually talk to people after an episode of [my favorite show]."

"this is like a digital tailgate!"

"humanity needs a platform that tells them to go outside."

"the internet was built to enable resource sharing and open communication, not to suppress them."

"the world needs an ed-tech platform built by someone who knows how to resonate with culture."

"this feels like a breath of fresh air. online today is extremely gimmicky."

let's build a cyph together.
